SmithCo Side Dump Trailers

HISTORY OF SMITHCO

The Leader in Side Dump Technology

HISTORY OF SMITHCO

- Founded in early 1990's by Greg Smith
  - Wanted to prevent costly end dump tip overs
  - Began to outrun companies using end dumps for the same jobs
- Benefits of a side dump
  - Safer: No need to back up into dump site.
  - Faster: 20-30 second dump cycle compared to minutes with other types of trailers
  - Cleaner: Fully welded to prevent leaks. No end gate hang ups. Watertight.
  - Versatile: You can put virtually anything* that can be dumped into the trailer

*Within reason

Did you know – SmithCo offers over a dozen products throughout multiple product lines.

SX SERIES

7 different axle configurations, watertight, works well with construction and aggregates.

TRUCK MOUNT BOX

Custom built to fit your truck chaise. Ideal for small dump zones and municipalities.

SmithCo
SIDE DUMP TRAILERS

TRAILERS WORKING WITHIN THE WASTE INDUSTRY

MHVSR TUB

Lower density material hauling

Designed for stackable/heapable materials

Works for composting, demolition, fill materials and up to 4" aggregate

Common hauls include manure and green waste

SHV TUB

Highest water full capacity

Designed for materials with low density, self-leveling materials

Watertight design

Common hauls include sludge, fruit waste, distiller's grain, biosolids

CP SERIES

Off-road trailer

Ideal for opening, closing and capping of landfills and site preparation

CP20, CPSHV20

THE BRUTE CP30

Off-road trailer

High capacity, stable solution for snow removal

Bolt on liner and extension options available
